

Bed Bug Prep Sheet

1. Carefully remove bedding from all mattresses and box springs (including mattress covers). Place immediately in large plastic garbage bag and immediately launder and dry at high temperature.
2. Please have the residence clean and reduced of clutter to ensure a proper treatment can be performed.
3. All people and pets will need to vacate the premises for 4 hours from the start of treatment.

Post Treatment

Important: Please remove any dead bedbugs you encounter. Inspect all the hot zone areas daily for a week...then once a week there after for a month.

A second treatment may be required depending on your level of infestation. This will be done between the 2 week/30 day window if needed.
